

QCPBarsGroup::remove

```
graph LR; A[QCPBarsGroup::remove] --> B[QCPBars::setBarsGroup]; A --> C[QCPBarsGroup::bars];
```

The diagram illustrates a branching relationship from a single source node to two target nodes. The source node, 'QCPBarsGroup::remove', is a gray rectangle on the left. Two blue arrows originate from its right side: one points diagonally up and to the right to the 'QCPBars::setBarsGroup' node, and the other points diagonally down and to the right to the 'QCPBarsGroup::bars' node. Both target nodes are white rectangles with black borders.

QCPBars::setBarsGroup
